

# The Future of Food & Farming

Monday, May 6 – Wednesday, May 8

Exhibits Open: 9AM - 5PM | National Mall near the Smithsonian Metro

The Future of Food and Farming on the National Mall celebrates and showcases America's equipment manufacturers, farmers, ranchers, and innovators, working together to drive the tradition of producing more with less environmental impact. The event is open to the public and all are encouraged to join us on the National Mall to interact with the equipment and get an up-close look at the machines that are often only seen on America's farm fields.

Experts from John Deere & GUSS, AGCO, CaseIH, New Holland, Mahindra, Great Plains, Krone, CLAAS, Lely, DeLaval, Lindsay, Kubota, Montag, Solinftec, Valley, Kuhn, Bluewhite, JCB, BouMatic, Guardian Ag, Arva, Netafim and Topcon will showcase the latest in equipment technology.
