Registration

Event Registration within the AEF ISOBUS Database is required to attend all or part of the Plugfest activities. Registration will open July 8th and close on or about August 21st. If you are planning to participate in testing activities, or attend as a visitor, please take a moment to confirm your AEF ISOBUS Database login credentials at:

<https://www.aef-isobus-database.org/isobusdb/app/home>

Further event registration instructions will be included in the next AEF announcement in early July. If you have questions in the meantime, contact Robert Waggoner (Robert.Waggoner@agcocorp.com) or Ludger Autermann (Ludger.Autermann@claas.com).

Test Matrix

AEF will prepare a Test Matrix of equipment connections for the Plugfest. The Test Matrix is a schedule of connections between each service-type product (e.g. terminals) and each client-type product (e.g. implement controllers) for a fixed amount of time. To be included in the Test Matrix, participants must register equipment details by completing an **Equipment Registration Form** online within the AEF ISOBUS Database **following** event registration. Participants will have the opportunity to review the Test Matrix in early in September before it is finalized.

Autumn 2015 AEF Plugfest Activities

Key Dates:
