

AEF ISOBUS Database: At your fingertips

www.aef-isobus-database.org

180-6-EN 10/2015

What the AEF ISOBUS Database does for you

- ✓ Find a compatible implement for your ISOBUS tractor to benefit from significant advantages.
- ✓ Find out whether an implement that you already own is ISOBUS-certified and compatible with the ISOBUS tractor you wish to buy.
- ✓ Find out which functionalities you can use with an ISOBUS combination.

You can now look up this and other information in the AEF ISOBUS database, at www.aef-isobus-database.org. It contains the relevant information about all machines and devices that have been AEF ISOBUS-certified so far. The database also speeds up troubleshooting through your dealer's customer service. This can appreciably shorten downtime and save your money.

After selecting a combination of tractor and implements with a few mouse clicks you can see immediately if the selected combination is compatible and which Functionalities it is equipped with. Alternatives can also be compared.
